

<u>Science Long Term Plan – KS1</u>

WORKING SCIENTIFICALLY

During years 1 and 2, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:

- asking simple questions and recognising that they can be answered in different ways
- observing closely, using simple equipment
- performing simple tests
- identifying and classifying
- using their observations and ideas to suggest answers to questions
- gathering and recording data to help in answering questions.

CYCLE A

AUTUMN	SPRING	SUMMER
ANIMALS INCLUDING HUMANS Pupils should be taught to: • identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.	EVERYDAY MATERIALS Pupils should be taught to: • distinguish between an object and the material from which it is made • identify and name a variety of everyday	LIVING THINGS & THEIR HABITATS Pupils should be taught to: • explore and compare the differences between things that are living, dead, and things that have never been alive
 notice that animals, including humans, have offspring which grow into adults find out about and describe the basic needs of animals, including humans, for survival (water, food and air) describe the importance for humans of exercise, eating the right amounts of different types of food, and 	 materials, including wood, plastic, glass, metal, water, and rock describe the simple physical properties of a variety of everyday materials 	 identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other identify and name a variety of plants and animals in their habitats, including microhabitats

Including: Seasonal Changes	Including: Seasonal Changes	 describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.
Observe changes across the four seasons Autumn (2 weeks at end of September) Winter (last week in December)	Observe changes across the four seasons Winter (first week in January) Spring (last week of March/ first week of April)	Including: Seasonal Changes Observe changes across the four seasons Summer (2 weeks in June)

CYCLE B

AUTUMN	SPRING	SUMMER
ANIMALS	EVERYDAY MATERIALS	PLANTS
 Pupils should be taught to: identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals identify and name a variety of common animals that are carnivores, herbivores and omnivores describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) 	 Pupils should be taught to: compare and group together a variety of everyday materials on the basis of their simple physical properties. identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. 	 Pupils should be taught to: identify and name a variety of common wild and garden plants, including deciduous and evergreen trees identify and describe the basic structure of a variety of common flowering plants, including trees. observe and describe how seeds and bulbs grow into mature plants find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.
Including: Seasonal Changes	Including: Seasonal Changes	Including: Seasonal Changes
Observe and describe weather associated with the seasons and how day length varies. Autumn (2 weeks at end of September) Winter (last week in December)	Observe and describe weather associated with the seasons and how day length varies. Winter (first week in January) Soring (last week of March/ first week of April)	Observe and describe weather associated with the seasons and how day length varies. Summer (2 weeks in June)
